Supplier**Portal**

SupplierPortal is a highly scalable, affordable online responsible sourcing solution for suppliers and their buyers to track and monitor environmental, labour, health & safety and bribery & corruption information.

Enabling responsible sourcing across supplier networks

Greenstone
Carbon Management

SupplierPortal is a highly scalable, affordable solution for suppliers to enter data and supporting information across key responsible sourcing areas, which can then be made available to multiple buying organisations by the suppliers.

A key benefit of **Supplier**Portal is its ability to provide suppliers with a carbon footprint report, while providing buyers with a comprehensive analysis and supplier benchmarking capability.

A global solution:

✓ Facilitates communication between buyers and their suppliers.

✓ Enables suppliers to calculate their carbon footprint and report key responsible sourcing information to multiple buyers.

✓ Enables buyers to make responsible sourcing decisions based on supplier performance and supporting information.

Buyer Benefits

• Ensures consistency and transparency of suppliers' carbon emissions, waste and water calculations.

• Enables comparisons and benchmarking across supplier groups.

• Engage with and support suppliers in improving responsible sourcing performance.

• Allows buyers to track suppliers' performance over time.

• Monitor compliance with recognised reporting schemes.

Supplier Benefits

• Record, calculate and report annual carbon emissions, waste and water consumption.

• Download carbon footprint, waste and water reports for general use.

• Comply with requests for information from multiple buyers at the same time.

• Publish accurate, transparent data to existing, new and prospective buyers.

• Secure, affordable, easy-to-use web accessible solution.

Features

SupplierPortal is an easy-to-use online solution for suppliers to record, calculate and report their annual carbon emissions and other responsible sourcing data; and for buyers to track and monitor performance over time.
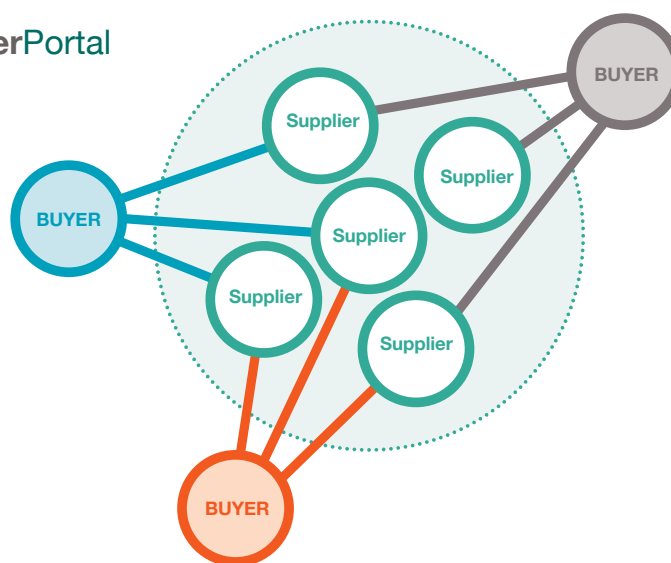

Features for suppliers:

- Report environmental data and other responsible sourcing metrics:
  - Environmental (carbon emissions, waste, water consumption)
  - Health & Safety
  - Labour (working conditions, child labour, freedom of association, diversity)
  - Anti-Bribery & Corruption

- Calculate an accurate carbon footprint and download a summary report of your carbon, waste and water footprint (GHG Protocol compliant).

- Report to multiple customers at once by selecting buyers you want to see your data.

Features for buyers:

- Unlimited access to suppliers' performance data.

- Track and monitor responsible sourcing metrics.

- Auditable, accurate and transparent data including supported documents.

- Search, filter and grouping functions.

- Track year-on-year performance.

- Benchmark, normalise and compare supplier performance.

SupplierPortal is a solution developed by Greenstone Carbon Management, the providers of global carbon management software, Acc$o_2$unt. Greenstone is a specialist solutions company that works in partnership with major commercial and public sector organisations to enable them to measure, manage and report their carbon emissions and other responsible sourcing data. Our consulting team provides a comprehensive range of expert advice and knowledge to our clients, covering scientific and commercial skills across multiple industry sectors.
